MAHALAKSHMI B

Backend Developer | Java, Spring Boot, Spring Security, REST APIs
+91 97917 59834 | mahalakshmiii567@gmail.com | linkedin.com/in/maha-lakshmi-169257329 | github.com/Mahalakshmi567

PROFESSIONAL SUMMARY

B.Tech Information Technology student (graduating 2028, CGPA 8.75/10) with hands-on backend development experience in Java, Spring Boot, Spring Data JPA/Hibernate, Spring Security, and RESTful API design, backed by relational database work in MySQL and PostgreSQL. Comfortable across the backend lifecycle: schema design, CRUD services, JWT auth and RBAC, caching with Redis, unit testing with JUnit, and real-time features using WebSockets. Also builds AI-integrated backend services using Spring AI and the Google Gemini API. Strong fundamentals in OOP, DSA, DBMS, and Operating Systems. Top 10 finalist in a 48-hour national hackathon.

TECHNICAL SKILLS

Languages: Java, Python, C
Backend & APIs: Spring Boot, Spring MVC, Spring Data JPA/Hibernate, Spring Security, Spring AI, RESTful API Design, Node.js/Express
Frontend: React.js, Vite
Databases & Caching: MySQL, PostgreSQL, Redis, Relational Database Design
Auth & Security: JWT Authentication, Role-Based Access Control (RBAC)
Real-Time & Testing: WebSockets (STOMP), JUnit, Unit Testing
AI Integration: Google Gemini API
Tools: Git, GitHub, Maven

PROJECTS

Releature - Feature Flag Management Dashboard | React, Spring Boot, PostgreSQL, Redis
GitHub: github.com/Mahalakshmi567/Releature
- Built a feature flag management dashboard with a React frontend and Spring Boot backend, using PostgreSQL for storage and Redis caching for fast flag lookups
- Implemented environment-specific flags, percentage rollouts, and user targeting to control feature releases
- Added audit history and rollback support to track flag changes and restore earlier states
- Secured the application with role-based access control (RBAC)

Lostify - Lost and Found Portal | Spring Boot, Spring Security, Spring AI, MySQL, WebSocket
GitHub: github.com/Mahalakshmi567/lost-found-portal
- Built a full-stack Lost & Found platform with JWT authentication and role-based access control (USER, ADMIN, MODERATOR)
- Integrated Spring AI with Gemini API to auto-generate image descriptions and power a Smart Lost Item Matching system with location-based search
- Designed a multi-stage Admin Verification workflow and real-time WebSocket/STOMP chat between claimants and item owners
- Implemented automated email notifications to alert users of potential item matches and claim updates

BugLens - AI-Powered Bug Tracking App | React.js/Vite, Node.js/Express, MySQL, Google Gemini API
GitHub: github.com/Mahalakshmi567/BugreportAnalyzer
- Developed an AI-powered bug tracking app with AI-driven bug classification and automatic duplicate detection
- Built a Code Fix Suggestion Agent and workload-based developer assignment engine to streamline triage and resolution
- Designed a dual-mode bug form (create/edit) and an AI chatbot widget for interactive dashboard support
- Applied clean architecture with centralized AI model config and clear separation of AI vs. CRUD routes

EDUCATION

Sri Manakula Vinayagar Engineering College (SMVEC), Puducherry
B.Tech in Information Technology | Expected Graduation: 2028 | CGPA: 8.75/10

Immaculate Heart of Mary Girls Higher Secondary School, Puducherry
Higher Secondary (Class 12) | 2024 | 88%
Secondary (Class 10) | 2022 | 91%

ACHIEVEMENTS & CERTIFICATIONS

- Top 10 Finalist - Auristra'26, 48-Hour National Hackathon, Takshashila University (2026)
- Novice Level - Google Arcade Cohort 1, Cloud & Technology Learning Challenges (2025)
- Programming in Java - NPTEL, IIT Kharagpur (2026)
- Operating Systems Fundamentals - NPTEL, IIT Madras (2025)
- AWS Cloud Fundamentals (2025)
