PROJECTS

Lostify - Lost and Found Portal | Spring Boot, Spring Security, Spring AI, MySQL, WebSocket
GitHub: github.com/Mahalakshmi567/lost-found-portal

- Built a full-stack Lost & Found platform with REST APIs, JWT authentication and role-based access control (USER, ADMIN, MODERATOR)
- Integrated Spring AI with the Gemini API for image descriptions and smart item matching with location-based search
- Designed a multi-stage admin verification workflow, real-time WebSocket/STOMP chat and automated email notifications

BugLens - AI-Powered Bug Tracking App | React.js/Vite, Node.js/Express, MySQL, Gemini API
GitHub: github.com/Mahalakshmi567/BugreportAnalyzer

- Developed a bug tracking app with AI-driven classification and automatic duplicate detection
- Built a Code Fix Suggestion Agent and a workload-based developer assignment engine
- Applied clean architecture, separating AI routes from CRUD routes with centralized AI model config

Releature - Feature Flag Management Dashboard | React, Spring Boot, PostgreSQL
GitHub: github.com/Mahalakshmi567/Releature

- Built a React and Spring Boot REST dashboard with environment-specific flags, percentage rollouts and user targeting
- Added audit history, rollback support and role-based access control (RBAC)
